

Boliwala — What We Need From You

Updated: 14 August 2026 · **Target launch:** 15 September 2026

1. Razorpay test keys ⚠️ THIS IS THE BIG ONE

1. Go to **dashboard.razorpay.com** and sign in (or create an account).
2. Top-right, make sure the toggle says **Test Mode**, not Live.
3. Go to **Settings** → **API Keys**.
4. Click **Generate Test Key**.
5. Send us both values: the **Key ID** (starts `rzptest`) and the **Key Secret**.

2. Start Razorpay live activation — 10 minutes to begin

1. Same dashboard → **Account & Settings** → **Account Activation**.
2. Fill in the business details and upload what it asks for — typically business PAN, GST certificate, bank account proof, and address proof.
3. Submit. You don't need to send us anything yet; just tell us it's submitted.

3. Resend account — 5 minutes

1. Go to **resend.com** and create a free account.
 2. Go to **API Keys** → **Create API Key**.
 3. Send us the key (starts `re_`).
-

4. Your real phone number and WhatsApp number

The footer currently shows no phone number at all. We removed the placeholder that was there — it was a **US number**, which would look wrong on an India-only product.

Send us: the phone number to display, and the WhatsApp number for the "chat with us" buttons. Confirm whether **hello@boliwala.com** is real, and send your Instagram and LinkedIn URLs.

5. Channel Partner portal — in or out?

Your requirements document describes a full partner portal: onboarding, earnings dashboard, referral links, commission payouts. That is **2–3 weeks of work on its own** and it depends on payments being finished first.

There is currently a partner dashboard page in the site that shows example data. We have secured it so the public can't reach it.

Choose one:

- **A. Drop it for launch** (recommended) — launch on time, build it after.
- **B. Build it** — realistically pushes the launch date.

6. Which admin screens must be real on day one?

Some admin screens still show sample data. Three of them (Payments, Packages, Success Fees) will fill in automatically once Razorpay is connected.

The rest are optional for launch. **We suggest building Users and Partners** (you'll need those to run the business) and leaving the marketing tools — email campaigns, WhatsApp tools, segments, analytics — until after launch.

Tell us if you disagree.

7. Sign off on the new "About" wording

We rewrote a section of the About page. The old version claimed **"₹2,100Cr won for clients", "840+ auctions won"** and **"28% average saving"**. None of those could be backed by anything in the system, so we replaced them with figures the site can prove and calculates automatically.

This wording is ours, not yours. Please read the About page and approve or change it.

8. Privacy Policy and Terms & Conditions

9. The three performance claims

Related to #7. If you want to state **"₹2,100Cr won"**, **"840+ auctions"** or **"28% average saving"** anywhere on the site, we need the real figures **in writing** from you. These are public financial claims, and right now nothing in the system can support them.

If you can't substantiate them, we leave them off. That's the current state and it is safe.

10. Your full bank list

The site currently shows **6 banks** because that's what's loaded. Send us the complete list of banks and NBFCs.

11. PAN and Aadhaar — how long, and who sees them?

You asked us to collect PAN and Aadhaar on user profiles, and we've built it. Both are optional for the user, checked for valid format, and visible only to the person who entered them.

Two things we still need from you, because they're legal decisions:

1. **How long do you keep them?** Aadhaar can't be kept indefinitely without a reason.
2. **Who in your team is allowed to look at them?**

Aadhaar is regulated in India. If you don't have a concrete use for it, the safest option is to stop collecting it — just say the word and we'll remove the field.

12. The domain

Send us the exact web address (e.g. boliwala.com) and confirm **who controls the registrar account**

13. Email domain records

Once you have the Resend account (#3) and the domain (#12), Resend gives us a few DNS records to add. Without them, emails go to spam or don't send at all. We'll send you the exact records to paste in.

14. Brand assets

Send your **logo** (SVG or high-resolution PNG), and a **share image** — the picture that appears when someone shares a Boliwala link on WhatsApp or LinkedIn.

15. Property photos

Every listing currently shows a bank logo instead of a photo. The upload system is built and working — there are simply no photos.

Quick checklist

- ☐ 1. Razorpay **test** keys → send to us
 - ☐ 2. Razorpay **live** activation → start it
 - ☐ 3. Resend account → send us the API key
 - ☐ 4. Phone, WhatsApp, email, social links
 - ☐ 5. Channel Partner portal — in or out?
 - ☐ 6. Which admin screens matter on day one
 - ☐ 7. Approve the new About page wording
 - ☐ 8. Privacy Policy + Terms text
 - ☐ 9. The three performance claims, or confirm we leave them off
 - ☐ 10. Full bank list
 - ☐ 11. PAN/Aadhaar — retention period and who can access
 - ☐ 12. Domain + registrar access
 - ☐ 13. DNS records for email
 - ☐ 14. Logo and share image
 - ☐ 15. Property photos, or confirm placeholders are fine
